Part 2 A – Review Comments

Review Comments:

Approved with comments, Code B with following comments:

- The approval does not imply that Contractor can go ahead with manufacturing. Any work carried out on wood ceiling prior to closing of RFI-N0025 shall be done at Contractor's own risk without any implications to the Client.
- The approval does not relieve the Contractor of his responsibility to comply with project specifications SECTION 055426, IFC drawings and reports of various trades. The material should comply with requirements set forth in all project documents.
- Description of the MAR is still incorrect. C4 is to be removed from the description as IWD-02 (already part of the MAR description) refer to Ceiling Palm Weave.
- As previously informed, remove any data pertaining to broken wood or Swedish softwood from the MAR. No other wood other than Walnut wood shall be used for IWD-05 and only walnut veneer shall be used for IWD-04.
- IWD-01 and IWD-02 comply with project specifications SECTION 055426 except as noted below. The proposed termite proofing by spraying in the MAR is not sufficient. As previously informed, Termite treatment shall be carried out by immersion as stated in the Warranty Letter by Wood works contracting Company. The emulsion must be diluted in water, as recommended by the manufacturer, in a large concrete basin prepared for this purpose. All wood-based products shall be immersed in mix for at least 24 hours. Additionally, the Contractor shall carry out termite proofing as proposed in the MAR by spraying on site.
- IACT-03 comply with project specifications SECTION 055426.
- Any approval for the MAR shall be revoked if detailed structural design calculations are not submitted separately taking into account the spans and loads for this project as stated in the MAR. Approval of these detailed calculations

Part 2 B – Quality Assurance Clearance
